Fall in Love with Your Spa Again

Spa ownership reaches new heights with Smartop.

Smartop spa cover offers a stylish solution to the fading, water-absorption, weight gain, odor, mildew and structural breakdown problems of many spa covers. Replace an old spa cover with Smartop to gain immediate beauty and ease-of-use with our exclusive EAS Lift & Assist — enabling light and easy opening and closing. Always custom-built for a perfect fit, Smartop enhances the spa experience and performance.

The Smartop Advantage

- No maintenance
- Zero water absorption
- Integrated lift system
- Durable and strong
- Exclusive heat retention system
- Safe and secure
- Durable rubber skirt

Built-In Privacy and Wind Screen

The perfect answer when space and clearance behind the spa is limited. Smartop upright allows the cover to rest above the spa, creating a perfect privacy and wind screen. The exclusive wind lock system — the only one of its kind — secures the cover in place preventing inadvertent closing. The EAS Lift & Assist makes for feather light lifting with just a fingertip.

 A minimum of 6 inches is required behind the spa and 7 inches on each side.

Offering a 360° View

Smartop Duo's exclusive two-piece design opens from the center, permitting each half to rest in a low position, exposing a 360° panoramic view from your spa. The integrated cover lift system is a perfect example of "form follows function" and offers ease-of-use and performance features you will love!

 A minimum of 15 inches is required behind the spa and 7 inches on each side.

Enhancement Options

Our colors match most leading spa manufacturer cabinets.

SmartShield 800

For those environments where maximum heat retention is of the highest priority — SmartShield 800 is the answer! With two styles to choose from, SmartShield 800 is applied to the bottom side of the Smartop and increases the already energy conscious cover by more than 20%.

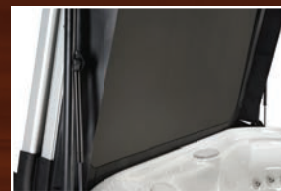

SmartShield 800 Reflective

is a proven material, utilizing radiant heat reflective technology, that elevates the level of heat retention.

SmartShield 800 Black

is a soft to the touch, dense material that serves as an added layer of insulation and assists with trapping heat in the hot tub.

Black Anodized Aluminum Trim

The popular black anodized trim choice gives Smartop a sporty, ultra-modern appearance. The semi-luster finish creates a fluid transition between the cover and black rubber skirting.

Whether a sleek and sporty, or stylish and elegant look is preferred, either trim choice stands up in extreme weather conditions. (Silver anodized aluminum trim comes standard.)

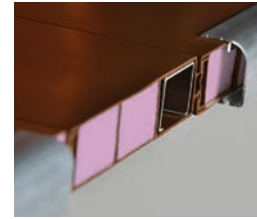

DeckMount Kit

The DeckMount Kit allows Smartop to be installed on spas that are recessed into the deck or ground by allowing the bracket to be mounted to a flat, horizontal deck rather than the vertical sidewall of the spa cabinet.

From the smallest spa to the largest swim spa, **Smartop is the SMART CHOICE.**

DURABLE & STRONG

UV RESISTANT POLYMER PANELS COMBINED WITH ALUMINIUM BRIDGE MEMBERS SUPPORT A WEIGHT LOAD OF MORE THAN 1,000 POUNDS

ZERO WATER ABSORPTION

DUE TO SMARTOP'S WATERTIGHT DESIGN AND WATERPROOF INSULATING FOAM, THERE IS ZERO WATER ABSORPTION

WIND LOCK BAR

KEEPS SMARTOP SAFELY SECURED IN THE OPEN, UPRIGHT POSITION

TAPERED DESIGN

ALLOWS FOR WATER RUN-OFF TO PREVENT POOLING

SAFE AND SECURE

STAINLESS STEEL LOCKDOWN STRAPS AND A COMBINATION PADLOCK PREVENT UNAUTHORIZED USE OF THE SPA

INTEGRATED LIFT SYSTEM

MAKES LIFTING SMARTOP OFF THE SPA EASY

EAS LIFT & ASSIST

FEATHER LIGHT AND FINGER TIP EASY OPENING. THE EXCLUSIVE EAS LIFT & ASSIST BRACKET ALLOWS THE COVER TO OPEN AND CLOSE GENTLY WITH EASE. *Patent Pending*

DURABLE RUBBER SKIRT

PREVENTS DIRT AND DUST FROM ENTERING THE SPA

THERMAL SUPER SEAL GASKET

LAYS FLAT ON THE SPA'S ACRYLIC TUB AND PREVENTS HEAT LOSS

ANODIZED ALUMINUM TRIM

CREATES A TIMELESS, ELEGANT LOOK

Energy Conscious? You Bet!

The cover is one of the most important components of the spa. It holds heat in the spa as well as prevents leaves, dirt and debris from entering the water. A traditional vinyl cover's ability to retain heat (commonly referred to as R-value) can be reduced by as much as 20% per year due to water and moisture absorption — resulting in escalating heating costs.

Smartop's impermeable, rigid polymer exterior shields the interior insulating foam from harsh chemical vapors and steam while the interior insulating foam from Owens Corning is specifically designed to resist water absorption, eliminating the problem of reduced R-value for the life of the cover.

3-Year Manufacturer-Backed Performance Assurance Guarantee

Each Smartop is manufactured with superior materials and craftsmanship and meets or exceeds all ASTM safety standards for UL classification resulting in a product that is warranted against defects in materials and workmanship. If your Smartop is found to be unserviceable due to defects in materials or workmanship within three years from date of purchase, replacement parts OR a replacement Smartop will be provided.

About Leisure Concepts

Leisure Concepts has been providing millions of satisfied homeowners quality products for over 20 years, making the company the #1 spa accessory manufacturer in the world. All manufacturing is completed in the USA in our 100,000 sq. ft. state-of-the-art facility allowing the strictest quality control and on-time delivery. Our goal is to provide quality products that offer many years of trouble-free ownership and 100% customer satisfaction.
